

UNIVERSITY COLLEGE LONDON
Department of Pharmacology

Wellcome Trust Funded Postdoctoral Position

Applications are invited for a Wellcome Trust funded postdoctoral research position (two years) to work on a project studying the role of targetting proteins in the protein and lipid phosphorylation/dephosphorylation cascades involved in the regulation of neuronal excitability and neurotransmitter release. The project will involve the use of electrophysiological, cell-imaging and molecular biological techniques. The position will be held in the Department of Pharmacology, which has strong research interests in molecular pharmacology and neurobiology. The department was rated in the highest category (5* in 1996) in all of the University Research Assessment Exercises to date. Prospective candidates should be highly motivated individuals with a good academic record and should ideally have experience in electrophysiological (patch-clamping) techniques, although candidates with a strong background in molecular neurobiology would also be considered. The starting salary will be on the 1A Research scale (From £19,585 to £25,275 including London Allowance). The position is available, in the first instance, for 14 months.

Application, including two copies of a full curriculum vitae and the names and addresses (including e-mail) of two referees should be sent to Dr. T. S. Sihra, Department of Pharmacology, (Medawar Building), University College London, Gower Street, London, WC1E 6BT (UK). For informal enquiries contact Dr Talvinder Sihra on -44-20-7679-3296/3385 or t.sihra@ucl.ac.uk. Details of the group's research interests and recent publications can be found at [http: www.ucl.ac.uk/Pharmacology/tss.html](http://www.ucl.ac.uk/Pharmacology/tss.html)

The closing date for applications is Wednesday 19 December 2001.
