TEXT EDITORS

For richer and more engaging content

## WHY USE THIS*

Simple text area

Recognise me? I'm your basic text area input with
<textarea>

Submit

- no formatting
- text only
- limited customisation (aesthetics only)

WHEN YOU COULD USE THIS?

- a plethora of formatting options
- can include images, links, tables, footnotes, etc
- customise functionality via plugins or custom code
- customise toolbar organisation
- customise aesthetics

Styles | Normal

custom unicode functionality

@ mentions for cross referencing

~~alluring insights~~

body p

*If you're only collecting simple input, use the simple text area. If users would benefit from having formatting etc, choose a rich text editor.

CK Editor is shown here and is recommended, particularly for Django projects, either through Python or JavaScript initialisation
