## Preliminary Reading List for Undergraduates

*Below is a list of readings (and useful websites) compiled by staff at the School of Planning, which we believe will serve as an inspiring introduction to the subject. These are not generally the core textbooks that you will use on your course (which tend to be hugely expensive to buy and we feel that can wait until you enrol and can borrow books from our library!). Please do not feel that you need to work your way through this list before joining. Simply follow what interests you.*
