Sessio	n topic focus	How to carry out research based on predefined questions on the heart or the brain.	
		how to distinguish between reputable and unreputable sources of information, and the ability to examine the implications of their research.	
Pre-Se	ssion Task		
		your source to answer the questions and note down your beginning of the session.	
1. 2. 3.	ty time: 15-20 mins What are cardiovascul What is cognition? What is heart failure? What is dementia?		
will als	so be used in the session		
Use Padlet <u>here</u> to view resources and like the ones you've used in your research.			
		arees and like the ones you ve used in your research.

Workbook Template

Pre-session tasks	 What are cardiovascular diseases? What is cognition? What is heart failure? What is dementia?
Why did you choose your sources?	
	Session Questions
Set A	1.How many people are affected by cardiovascular disease, dementia, (UK and worldwide)2.Is there a cure for heart failure or dementia?
Set B	 1.What treatments are currently given out for heart failure / dementia? 2.Which health professionals do patients with cardiovascular disease or dementia see? 3.What can you learn from different perspectives
Extra Notes / things to remember
