

B3D Handout 1: Logistics

Lecturer: Dr. H. J. Wilson — Room 802A — e-mail: helen.wilson@ucl.ac.uk

Lectures

There will be 3 lectures per week for 10 weeks, with a reading week in the middle.

- Mondays [706], Tuesdays [505], Wednesdays [505] 11–12.

The first lecture is on Tuesday January 10th and the last on Wednesday March 22nd. There are no lectures in the week of 13–17th February.

Example sheets

Each week on Monday I will hand out an example sheet. You should attempt as many questions as you can. Your solutions will be collected in one week later before the Monday lecture.

Problem Classes

Once your first homework has been marked, there will be an example class each week, run by Dr Baigent, on Thursdays at 11. These will focus on the areas which proved most troublesome in the homework.

Office Hour

I will be in my office every Thursday from 2–3pm for you to come individually to ask me questions. I will also be happy to see you any other time if I'm in — but be warned, I work from home on Fridays!

Course Website

Relevant course materials, including example sheets, worked solutions and copies of handouts, will all be on the course website:

<http://www.ucl.ac.uk/~ucahhwi/B3D/>

What I expect from you

- Attend lectures
- Take notes during lectures
- Attempt the examples **before** you ask for help on them – but do ask!
- Hand in example sheets on time
- Ask questions as they occur to you
- Turn off your mobile phone!

What you can expect from me

- Clear lectures with notes written on the board or OHP for you to write down, or handouts of specific topics
- Examples which can be solved based on what is covered in lectures
- Non-judgemental help and fair response to questions, both during lectures and if you visit my office
- Prompt response to emails
